

Provider Update

To: Sharp Health Plan Physicians and Office Staff
From: Sharp Health Plan Quality Improvement Department
Date: February 10, 2017
Subject: HEDIS 2017 Data Collection Project

HEDIS® (Healthcare Effectiveness Data and Information Set) is a set of quality performance measures developed by the National Committee for Quality Assurance (NCQA) that allows consumers to compare health plans and make purchasing decisions based on quality and their unique needs. HEDIS rates also enable Sharp Health Plan to identify opportunities to improve the quality of care for our members.

This year Sharp Health Plan will be conducting medical record review from mid-February through April for the following measures

- Adult BMI Assessment
- Cervical Cancer Screening
- Childhood Immunization Status
- Colorectal Cancer Screening
- Comprehensive Diabetes Care
- Controlling High Blood Pressure
- Immunizations for Adolescents
- Medication Reconciliation Post-Discharge
- Prenatal & Postpartum Care
- Weight Assessment & Counseling for Nutrition and Physical Activity for Children

You may be contacted by our contracted copy service J & H Copy Services, Inc. with a request for medical records or to schedule on-site visit to copy required documentation.

Please feel free to contact HEDIS Project Coordinator with any questions or concerns.
